

# Fracking

and other extreme gas extraction

# is threatening our area

The government has recently approved licences which cover all of the above areas meaning companies can start exploring for gas. To find out more attend a public meeting on

**23<sup>rd</sup> October, 7pm**

**at John Clifford School, Nether Street, Beeston,  
NG9 2AT**

Frack Free Nottinghamshire

## Why should we be worried?

Fracking is a new way of extracting gas, likely to be carried out at far deeper levels (with more complex technologies) than previous UK onshore wells and has proven very damaging in parts of US and Australia.

Some of the likely problems:

- contamination of drinking water and farm land
- methane gas leakages
- water shortages
- negative impact on house prices and insurance
- increased pollution encouraging climate change

## What to expect on the 23<sup>rd</sup> October

- What is fracking and how is it viewed? Pro and anti
- Where could fracking happen in this area?
- The anti-fracking experience from the Lancashire Nannas
- Next steps for local action
